

Pam ydyn ni'n torri coed?

Rydym wedi torri grwpiau o goed sydd wedi'u heintio â'r afiechyd ffwngaid **Phytophthora ramorum**. Bydd hyn yn helpu i'w atal rhag lledaenu drwy'r goedwig.

Byddwn yn gadael y coed ar y ddaear nes y gallwn glirio'r ardal gyfan a phlannu coed newydd. Rydym wedi derbyn hysbysiad cyfreithiol i dorri'r coed hyn oherwydd eu bod wedi eu heintio.

Why are we cutting down trees?

We have felled groups of trees infected with the fungus-like disease **Phytophthora ramorum**. This will help stop it spreading through the forest.

We will leave the trees on the ground until we can clear the whole area and plant new trees. A legal notice has been issued to us to fell these trees because they are infected.
